Gold Whole House Filtration System

STAGE 1: SEDIMENT FILTRATION

Is dedicated to removing sediment, and particles from the water supply. This stage effectively eliminates dirt, sand, rust, algae and many other debris, preventing clogging and prolonging the lifespan of the subsequent filters.

REMOVES

Sediment
Dust
Dirt
Rust
Sand
Silt
Algae

STAGE 2: ACTIVATED GOLD CARBON FILTRATION

Works to remove chlorine, chloramine, volatile organic compounds (VOCs), unpleasant odours, and taste from the water. This highly efficient GOLD series filter absorbs and traps these contaminants, ensuring that the water flowing through your tapware, showers and appliances are all clean and safe.

REMOVES

Chlorine
Bad Taste
Odours
Colour
Pesticides

STAGE 3: ARAGON GOLD FILTER

Have a filtration technology that combines mechanical filtration, adsorption filtration, ion-exchange and electric adsorption. The tested market leading GOLD Aragon cartridge have shown 100% water decontamination efficiency from viral pollution PFAS and will remove 99.9% of human pathogens.

REMOVES

Aluminium
Barium
Cadmium
Copper
Cryptosporidium
Giardia Cysts
Radium
Sodium
Selenium
E Coli Bacteria
Hydrocarbons
Iron
Lead
Manganese
Mercury Nitrate
Potassium
